The length of sentence and institutional behavior determines the custody level. Offenders with more than eight years to serve are C-5 (maximum security). Offenders with less than 12 months to serve and with good institutional behavior are C-1. Sex offenders who are required to complete the Missouri Sex

Offender Program (MOSOP) have a minimum custody override of C-4. Escapees are held at C-5 institutions until release. Female offenders are not housed by custody level.

* The felony class of the most populous charge code.

The statutory defined offense may include more than one charge code.

Life Sentences and sentences over 30 years are computed at 30 years.

New court commitments include offenders sentenced by the courts to a term commitment. New court commitments do not include offenders sentenced to a 120 day, long term drug program, probation or parole revocations. Offenders convicted of the attempt of the offense are excluded (the offenders are sentenced to one felony class lower.)

The felony class is the current felony class for the offense. Some offenses, including Child Molestation 1st and Endangering the Welfare of a Child have had the felony class of the offense increased during the analysis period.

7. Time Served to First Release

Time served as a percent of the sentence in FY 2010 is the same as in FY 2009 (48.3%). Offenders convicted of offenses committed on or before August 28, 1994 have to serve a minimum prison term if they have committed a dangerous felony (85%) or have prior incarcerations with the Missouri Department of Corrections (40% one prior, 50% two priors and 80% three or more prior incarcerations). Time served includes jail time that is credited to an offender's sentence for incarceration prior to receipt by the Department of Corrections. Offenders convicted of a sex offense in Chapter 566 RSMO have to complete the Missouri Sex Offender Program before being eligible for a parole release.

First release is the first release following the admission for a new commitment. First releases do not include the release of offenders who were returned as parole violators.

8. Recidivism Rates of Institutional Releases

There are many ways to measure recidivism and there are no national standards. The rates calculated by the Missouri Department of Corrections and included in the Offender Profile are for offenders first released in the commitment. These are offenders admitted to prison to serve a new commitment and released to either parole, conditional release or on the discharge of the sentence. Excluded from the calculation is the release of parole violators who have previously been returned to prison for a violation of supervision within the commitment. Recidivism rates that include the release of parole violators are higher than the first release recidivism rates.

The recidivism rates measure two outcomes:

1. The first return to prison following the release (technical violation of supervision or new conviction),
2. The first conviction following the release from prison (the new conviction can be a new prison sentence or probation. Because many offenders returned from parole are returned for a technical violation) the new conviction recidivism rate is not a very helpful indicator of new criminal behavior until two or more years from release.

The data for the calculation of the rates are taken from the DOC offender database. Offenses and incarcerations in other states will not be included unless the offender is returned to the custody of the DOC.

Other recidivism rates are given in the Offender Supervision profile for offenders released to probation following a 120-day or long-term drug program and for offenders serving a new court probation.

Since 2005 there has been a decline in the incarceration recidivism rate both for offenders released from prison (page 58) and for offenders starting probation (page 102). The reduction in recidivism has been attributed to the Department's reentry program, improvements in risk assessment for releasing and managing offenders in the field and changes in supervision practices by the division of probation and parole. The changes in supervision practices were intended to reduce the number of offenders being incarcerated for technical violations when the offenders could continue to be safely supervised in the community.

Time Served to First Release

Offenders convicted of offenses committed after August 28, 1994 have to serve a minimum prison term if they have committed a dangerous felony (85%) or have prior incarcerations with the Missouri Department of Corrections (40% one prior, 50% two priors and 80% three or more prior incarcerations). Time served includes jail time that is credited to an offender's sentence for incarceration prior to receipt by the Department of Corrections. Offenders convicted of a sex offense as defined in 589.015 are required to complete the Missouri Sex Offender Program before being eligible for parole.

Execution is an authorized punishment for offenders convicted of Murder 1st degree. Offenders not sentenced to death must serve life without parole. The first execution in Missouri following the US Supreme Court decision authorizing the legality of capital punishment statutes took place in 1989, although the new capital punishment law became effective in Missouri on May 26, 1977. From June 30, 1991 to June 30, 2010 there have been 64 executions.

The statistics count offenders on the first admission by the Department of Corrections for a conviction of Murder 1st degree for an offense committed after October 1984 or a conviction for capital murder prior to October 1984. Prior to October 1984, Murder 1st degree allowed parole. Re-sentencing and commutation of the death penalty are not included in the charts.

Supervision Assessment (Offender Needs Score)

During the first ninety days of supervision, the offender is in the assessment period. At the end of that period, the supervision level is based on the field risk reduction instrument completed by the probation and parole officers. This assessment is based on the offenders' prior history and current interaction with the community.

The Need Score is a risk and needs assessment completed by the supervising probation and parole officer. For offenders on regular supervision it is updated every 60 days. The assessment determines the level of supervision and the need for community programming and supervision strategies. The scoring of the components of the last needs assessment on or before June 30, 2010 is shown after the level of supervision. Offenders in the community release centers are not included in the Needs assessment.

| Other | 7.1% | 4.6% |

Supervision openings have increased 0.2% per year in the last five years compared to a 2.6% increase from FY2001 to FY2005. What is of significance to the department, because of the impact upon supervision caseload, is the increase in paroled offenders of 0.8% per year. Senate Bill 5 enacted in 2003 removed non-violent misdemeanor cases from DOC probation supervision, and this has been the main reason for the decline in new court probations.
